DETAILED ACTION

Response to Amendment

1. This action is in response to the request for reconsideration filed on 8/15/06.
2. As per applicant's request claims 1-21 and specification have been amended.
3. As per applicant request claims 1-21 has been considered but they are not persuasive.
4. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by *Bennett et al* USPN 6,126,329.

In remarks applicant argues,

- I. Cited reference does not disclose both an analysis data generating section for generating from a source program, analysis data of the source program and a profile data generating section for generating profile data on the basis of the first executable program.
- II. Cited reference does not disclose both a first executable program generating section for generating a first executable program on the basis of the analysis data and a second executable program generating section for generating a second executable program on the basis of the analysis data and the profile data.

In response to applicant's arguments,

- I. It was noted that cited reference fairly suggest both an analysis data generating section for generating from a source program, analysis data of the source program and a profile data generating section for generating profile data on the basis of the first executable program (figures

Art Unit: 2191

4-5, column 7, lines 48-58, "after parsing the function code... can be intermixed"). Therefore, examiner interprets that analysis has been generated on a basic block and then data as been profiled and added to the function as determined according to the above analysis. Thus, limitations are met by the reference.

II. It was also noted that reference suggest first executable program generating section for generating a first executable program on the basis of the analysis data and a second executable program generating section for generating a second executable program on the basis of the analysis data and the profile data (figures 3-5, column 6, lines 63-67, "these profiling routines...other timing, column 8, lines 25-61, "each time the basic block is executed... additional profiling code"). Thus, examiner interprets that executable program works in conjunction with profiling instruction for analysis data and profiling data. Therefore, limitations are met by the reference.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
